**Natural Science Illustration:** A class exploring the wonders of nature through applied art. We will draw insects, Arachnids, mammals, reptiles & amphibians, seashells, bones, feathers, fur, fungi, and flowers using a variety of media (watercolor, pen & ink, colored pencil, graphite, acrylic and scratchboard) enhanced with various techniques (layout, mixing, shading and blending).

Students will learn about the subject's natural history, classification and Latin name. Students will also learn about various artists and be gently guided in the art of critique. Instruction takes place in a round table setting. Students should come with a desire to draw and ability to focus for two hours. Materials (and popcorn!) are provided in class.
